

ARIYANTO BUDIMAN

Programmer

Jakarta, Indonesia | aribdmn99@gmail.com | +62 8964 4159 667 | linkedin.com/in/aribdmn99

SUMMARY

Software professional with over 6 years of experience in backend logic development, data integrity, and system automation. Highly proficient in scripting, database optimization, and implementing complex business logic. Experienced in troubleshooting production-level applications and ensuring high-performance data processing. Transitioning extensive expertise from data-driven systems to scalable web application development, with a focus on clean code, RESTful API integration, and performance optimization in Agile/Scrum environments.

EXPERIENCE

SURVEY PROGRAMMER

NielsenIQ – Jakarta, Indonesia

September 2019 – Present

- Architected and developed complex logic-driven applications for large-scale data collection, ensuring high availability and zero-latency data processing.
- Spearheaded the technical translation of business requirements into functional scripts, utilizing complex routing, validation logic, and randomization.
- Led technical troubleshooting for production systems, identifying root causes in backend logic and implementing robust bug fixes in high-concurrency environments.
- Optimized database interactions for large datasets (millions of records), ensuring efficient data export and reporting for stakeholders.
- Collaborated within an Agile/Scrum framework to deliver functional system modules, coordinating with product owners and cross-functional teams.

QUALITY ASSURANCE / SURVEY TESTER

NielsenIQ – Jakarta, Indonesia

October 2017 – September 2019

- Executed comprehensive functional testing for system modules, validating logic flows, API integrations, and database consistency.
- Identified, documented, and resolved critical bugs, improving system stability and usability across multiple platforms.
- Verified datasets and system outputs to ensure integrity, accuracy, and compliance with project specifications.
- Managed testing cycles across various devices and browsers, ensuring cross-platform compatibility and high-quality user experience.

SKILLS

Programming	Python, JavaScript, Java, Visual Basic, SQL
Backend & API	RESTful API, JSON/XML, Node.js (Familiar), Laravel (Familiar)
Databases	MySQL, PostgreSQL, SPSS
DevOps & Tools	Git/GitHub, VS Code, CI/CD Concepts, Jira/Confluence
Methodology	Agile/Scrum, SDLC, Quality Assurance, Functional Testing

EDUCATION

Bachelor of Informatics Engineering
Universitas Indraprasta PGRI – Jakarta, Indonesia

LANGUAGES

Indonesian Native	English Intermediate
